

eTwinning project 2008/2009

Title: **OUR NEIGHBOURHOOD**

Short description: Partner schools introduce their neighborhood to each other. The places of interest are presented in various ways, in cultural, historical and geographical aspects.

Languages: English

Subject areas: Art, Cross Curricular, Geography, History of Culture, Informatics/ICT, Media Education, Foreign Languages, History.

Tools to be used: e-mails, MP3, Web Publishing, Forum, Other software (PP, pictures, photos)

Aims: The students should be able to introduce their neighborhood to the people from other countries. At the same time they expand their knowledge about their home. Learning from the foreign countries from students at the same age is certainly the most effective.

Work process: First we prepare a list of our places of interest. We start with the oldest objects in historical view. Each term an object will be explored in different cross curricular ways.

Expected results: The students will create e-portfolios about each object, including photos, pictures, texts, audio and video files. The products will be exposed in a blog.
